ABBREVIATIONS GUIDE:

ST: Step Therapy—For medications marked with “ST,” members are encouraged to try a less expensive, similar drug first. Your doctor can request authorization of the stepped (ST) medication and it will be approved if it meets our criteria.

PA: Pre-Authorization—ConnectiCare requires these drugs to be submitted for authorization to ensure that the medication is being prescribed and used appropriately.

QL: Quantity Limit—These medications have restrictions on the number of tablets/capsules/packages that are dispensed, to ensure they are being prescribed in the correct quantities and/or dosages.

SP: Fill at a specialty pharmacy—These medications are best filled at a designated Specialty Pharmacy, which has more knowledge of the clinical use and handling of these lesser used, more costly drugs.

MB: Medical Benefit—These prescriptions are typically supplied and administered by a physician in their office, and are not filled by the member at a pharmacy.
