

DRUG PRIOR AUTHORIZATION LIST

In an effort to promote the appropriate use of certain drugs and to help better manage the cost of expensive drugs, the ConnectiCare Pharmacy & Therapeutics Committee has developed a list of prescription drugs that require prior authorization. Prior authorization requests must be faxed to ConnectiCare's Pharmacy Services department at 860-674-2851 or toll-free at 800-249-1367 by the prescribing physician's office. POS members receiving out-of-network care are responsible for initiating this process. When submitting a request for Prior Authorization, please use a Prior Authorization form which can be obtained from ConnectiCare.com or by calling ConnectiCare at 800-251-7722. If the prescribed drug is approved, the prescription will be filled as usual at a participating pharmacy or administered by a provider (where appropriate).

Note: Self-administered medications (i.e. interferons), even those not on this list, may not be dispensed for self-administration and billed through the medical benefit by a provider. They must be dispensed through a participating pharmacy.

(*) prior authorization is not required within the first 90 days of membership with ConnectiCare.

(^M) physician-administered drug, usually billed under the medical benefit.

(@) Prior Authorization required for members of ConnectiCare Exchange Plans and ConnectiCare SOLO Plans only

To find a drug, click on a letter and browse the table alphabetically.
