

Commercial/Healthcare Exchange PA Criteria

Effective: October 2013

Prior Authorization: Procysbi

Products Affected: Procysbi (cysteamine bitartate) delayed release capsules, Procysbi (cysteamine bitartate) oral packet

Medication Description:

Procysbi (cysteamine bitartate) is an aminothiols that participates within lysosomes in a thiol-disulfide interchange reaction converting cystine into cysteine and cysteine-cysteamine mixed disulfide, both of which can exit the lysosome in patients with cystinosis.

Covered Uses: Treatment of nephropathic cystinosis in adults and pediatric patients 1 year of age and older.

Exclusion Criteria:

1. Patients with serious hypersensitivity reaction, including anaphylaxis, to penicillamine or cysteamine.

Required Medical Information:

1. Diagnosis
2. Previous medications tried/failed

Age Restrictions: 1 year of age and older

Prescriber Restrictions: N/A

Coverage Duration: 12 months

Other Criteria:

- A. The patient has a documented diagnosis of nephropathic cystinosis; **AND**
- B. The patient has a documented failure of, intolerance to, or contraindication of immediate release cysteamine bitartrate (Cystagon)
