

## PHARMACY PRE-AUTHORIZATION CRITERIA

<b>DRUG (S)</b>	Vusion (0.25% miconazole nitrate/15% zinc oxide/81.35% white petrolatum ointment)
<b>POLICY #</b>	13137
<b>INDICATIONS</b>	Vusion ointment is indicated for the adjunctive treatment of diaper dermatitis only when complicated by documented candidiasis (microscopic evidence of pseudo-hyphae and /or budding yeast) in immunocompetent pediatric patients 4 weeks and older. A positive culture for <i>C albicans</i> is not adequate evidence of candidal infection since colonization with <i>C albicans</i> can result in a positive culture. The presence of candidal infection should be established by microscopic evaluation prior to initiating evaluation.
<b>CRITERIA</b>	ConnectiCare considers Vusion ointment to be medically necessary for patients 4 weeks of age and older who meet the following criteria: <ul style="list-style-type: none"><li>• Patient has persistent diaper dermatitis despite two trials of reasonable conventional therapy. (ie. preparations with zinc oxide or petrolatum, A&amp;D ointment, nystatin cream/ointment)</li></ul>
<b>LIMITATIONS</b>	<ul style="list-style-type: none"><li>• If the above criteria are met, approval of Vusion ointment may be granted for up to 1 week. The safety of Vusion ointment when used for longer than 7 days is not known.</li><li>• Approval of Vusion ointment will be limited to 1 tube</li></ul>
