Evolent Clinical Guideline 3016 for Margenza™ (margetuximab-cmkb)

Guideline Number:	Applicable Codes	
Evolent_CG_3016		
"Evolent" refers to Evolent Health LLC and Evolent Specialty Services, Inc. 		
Original Date: February 2021	**Last Revised Date:** February 2025	**Implementation Date:** February 2025

TABLE OF CONTENTS

STATEMENT

Purpose

To define and describe the accepted indications for Margenza (margetuximab-cmkb) usage in the treatment of cancer, including FDA approved indications, and off-label indications.

Evolent is responsible for processing all medication requests from network ordering providers. Medications not authorized by Evolent may be deemed as not approvable and therefore not reimbursable.

The use of this drug must be supported by one of the following: FDA approved product labeling, CMS-approved compendia, National Comprehensive Cancer Network (NCCN), American Society of Clinical Oncology (ASCO) clinical guidelines, or peer-reviewed literature that meets the requirements of the CMS Medicare Benefit Policy Manual Chapter 15.

INDICATIONS

Continuation requests for a not-approvable medication shall be exempt from this Evolent policy provided

- The member has not experienced disease progression on the requested medication AND
- The requested medication was used within the last year without a lapse of more than 30 days of having an active authorization AND
- Additional medication(s) are not being added to the continuation request.

Metastatic HER-2 + Breast Cancer

- NOTE: Margenza (margetuximab-cmkb) use with or without chemotherapy, is not supported by Evolent Policy for the treatment of metastatic HER2 positive breast cancer. This policy position is supported by data from the Phase 3 SOPHIA trial (please see reference below) which demonstrated no significant overall survival benefit of the above regimen over [trastuzumab + chemotherapy]. Please refer to the alternative agents/regimens recommended by Evolent including but not limited to regimens at **Evolent Pathways**.

CONTRAINDICATIONS/WARNINGS

- None

EXCLUSION CRITERIA

- Dosing exceeds single dose limit of Margenza (margetuximab-cmkb) 15 mg/kg.
- Investigational use of Margenza (margetuximab-cmkb) with an off-label indication that is not sufficient in evidence or is not generally accepted by the medical community. Sufficient evidence that is not supported by CMS recognized compendia

or acceptable peer reviewed literature is defined as any of the following:

- Whether the clinical characteristics of the patient and the cancer are adequately represented in the published evidence.
- Whether the administered chemotherapy/biologic therapy/immune therapy/targeted therapy/other oncologic therapy regimen is adequately represented in the published evidence.
- Whether the reported study outcomes represent clinically meaningful outcomes experienced by patients. Generally, the definitions of Clinically Meaningful outcomes are those recommended by ASCO, e.g., Hazard Ratio of less than 0.80 and the recommended survival benefit for OS and PFS should be at least 3 months.
- Whether the experimental design, considering the drugs and conditions under investigation, is appropriate to address the investigative question. (For example, in some clinical studies, it may be unnecessary or not feasible to use randomization, double blind trials, placebos, or crossover).
- That non-randomized clinical trials with a significant number of subjects may be a basis for supportive clinical evidence for determining accepted uses of drugs.
- That case reports are generally considered uncontrolled and anecdotal information and do not provide adequate supportive clinical evidence for determining accepted uses of drugs.
- That abstracts (including meeting abstracts) without the full article from the approved peer-reviewed journals lack supporting clinical evidence for determining accepted uses of drugs.

CODING AND STANDARDS

Codes

- J9353 - Injection, margetuximab-cmkb, 5 mg

Applicable Lines of Business

☐	CHIP (Children's Health Insurance Program)
☒	Commercial
☒	Exchange/Marketplace
☒	Medicaid
☐	Medicare Advantage

POLICY HISTORY

Date	Summary
February 2025	• Converted to new Evolent guideline template • This guideline replaces UM ONC_1420 Margenza (margetuximab-cmkb)
February 2024	• Updated exclusion criteria • Updated NCH verbiage to Evolent

LEGAL AND COMPLIANCE

Guideline Approval

Committee
